

Aquaculture Entrepreneurship Training Program

Aquaculture has been practised for centuries, if not millennia, especially in Asia. Most aquaculture activities continue to be based on traditional, small- to medium-scale operations employing mainly extensive and semi-intensive production methods.

In some countries, some types of aquaculture are increasingly being transformed into semi-industrial occupations. Aquaculture is contributing to a growing share of global fish supply of both marine (primarily molluscs and seaweeds) and freshwater (primarily carps) species.

This TURKEY TRAININGS Aquaculture Entrepreneurship Certificate Program aims to benefit experienced aquaculture staff who are working in or ready to progress to aquaculture management roles or at anyone with a professional interest in the aquaculture industry.

With this course you can gain a diploma-level qualification in aquaculture management while working in the aquaculture industry.

PROGRAM OBJECTIVES AND LEARNING OBJECTIVES:

By the end of this TURKEY TRAININGS training seminar, you will learn about:

- Fish Farm Operations and Production
- Fish Health and Welfare
- Hatchery Operations and Production
- Shellfish Operations and Production
- Health and Safety for the Production Environment

02 →

WHO IS THE COURSE FOR:

This TURKEY TRAININGS training course is suitable to a wide range of professionals but will greatly benefit those who are scientific observers, fishing fleet and regional fisheries managers, biologists in organisations such as aqua or fish centres, or who want to build their career as an Entrepreneur as this course provides basics about the fish farming.

DAY 01

- Site Selection and Aquafarm Establishment
- Pond Construction

DAY 02

- Fish Seed Production and Genetic Engineering
- Fish Fingerling Production and Hatchery Management
- Introduction to Fish Genetics and Biotechnology
- Practical Genetic Application for Aquaculture and Fisheries Management

DAY 03

- Fish Farm Management and Culture Systems
- Fish Farm Management
- Oyster Farming
- Cage and Pen Culture
- Fish Health Management and Disease Control
- Economics of Fish Production and Marketing

DAY 04

- Fish Feed Production
- Fish Feed Formulation and Production
- Fish Feed Production and Technology

DAY 05

- Fish Post Harvest
- Field Trips and On-Site Investigations in Bafa Lake
